

WeRateDogs Twitter Analysis

The dataset that we will be wrangling and make our analyzing on it are the tweet archive of Twitter user **@dog_rates**, also known as WeRateDogs. WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. 11/10, 12/10, 13/10, etc. Why? Because "they're good dogs Brent." WeRateDogs has over 4 million followers and has received international media coverage.

Showing stages of dogs appearance in the WeRateDogs Twitter account

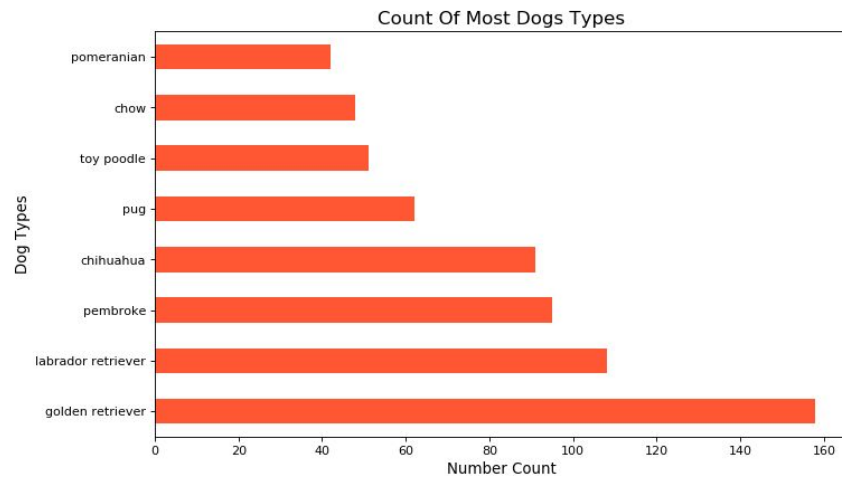

In our analysis on the WeRateDogs we found the Pupper dog stages are the most common rating in the WeRateDogs Twitter account with 168 tweets. And then comes Doggo in the second with 54 tweets. Then Puppo with 21 tweets and Floofer with 7 tweets. And we find some dogs classified under two type doggo, pupper with 8 tweets. And doggo, floofer & doggo, puppo with one tweet. We can say that many people prefer young dogs and interested in it than the older one.

Showing counts of dog types and most them in WeRateDogs Twitter account

In the second data analysis chart, the gold retriever sits on the shrine of the most viewed dog type among all the types analyzed with an average of 158 number counts. The Labrador retriever ranked second, followed by the Pembroke and Chihuahua. The

preference here shifted to the dogs with greater height than the short height ones, with the exception of few short height dogs which made it to the top eight in the ranking.

Showing a relationship between numbers of retweet and favorite

The third chart shows the activity of the twitter account in terms of retweets and favorites gained from Twitter users. The dense area shows that average of 20k retweet and 70k favorite counts is consistent on the account. The correlation remains positive between the two variables.
